Mgt – Management

Updated by Curriculum 09/14/18

To begin, read through the lists of programs (majors, minors, and certificates) offered at BYU–Hawaii in each of the three categories (see the back of this page).

To build your Holokai, you will need to choose one program as your major and two programs from different categories as your minors and/or certificates. All the choices for your Holokai should be located in separate columns and separate rows. Furthermore, you can also choose other programs as additional majors, minors, and/or certificates if they are completed within 4 years.

Once you have decided your Holokai, please write those programs into the chart below. Bring your chart with you to your next visit at the Academic Advising Office.

HOLOKAI: My ACADEMIC VOYAGE

A degree from BYU–Hawaii is made up of four kinds of classes: core classes, classes from the Arts & Humanities category, classes from the Math & Sciences category, and classes from the Professional Studies category. When first choosing classes for their freshman semester, students are encouraged to explore different programs by taking introductory classes from each category. In the end, students will have completed one major program and two minor and/or certificate programs, each from a different category and from a different department, in order to earn a degree.
